

CD-ROM/CD-R - CD Silkscreen Specs

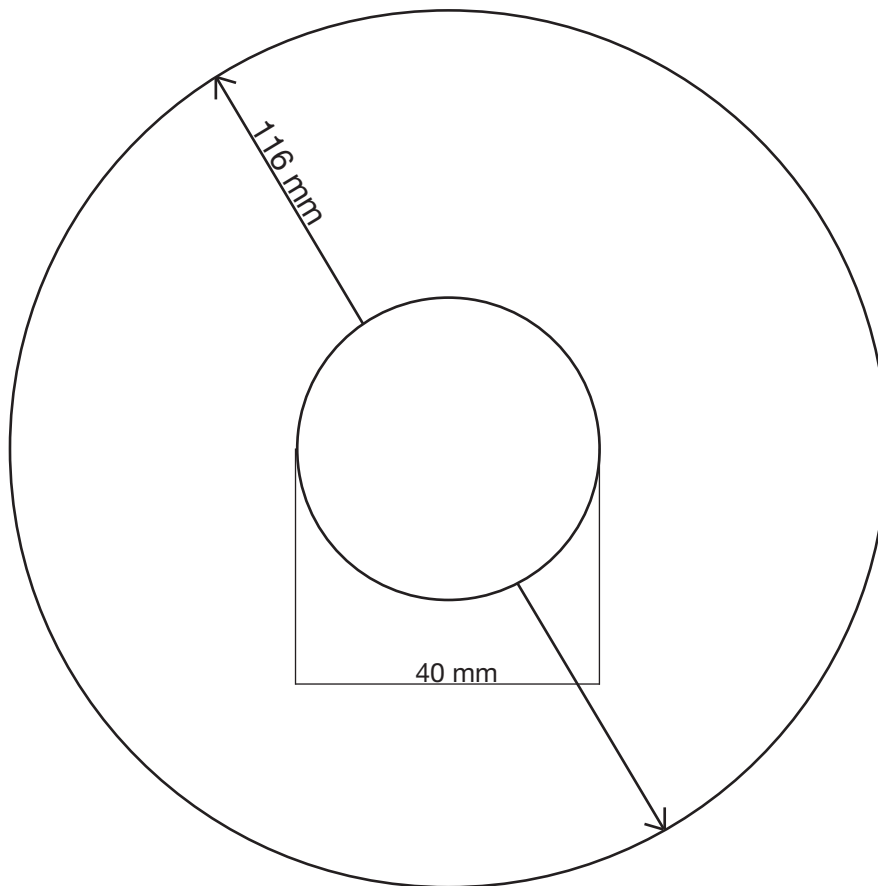

Printable area 116 mm to 40 mm

Include all fonts & hi resolution images used (300dpi).

All fonts should be 6 points or larger.

Please provide a color copy of file.

Preferred: Macintosh files.

———— printable area

Special note to designers: Printing of gradient tints or vignettes may cause banding (changing of densities in distinct steps instead of a smooth and gradual transition), and therefore is not recommended.

Any screen less than 20% may not print, and screen over 85% may print solid.
